

WASTE TO ENERGY EXPO 2026

“Turning Waste into Wealth, Powering a Sustainable Future”

27-28-29 March 2026

Auto Cluster Exhibition Centre, MIDC,
Pimpri-Chinchwad, **Pune**

ORGANIZED BY

ABOUT US

The Waste to Energy Exhibition 2025 marks the first edition dedicated exclusively to Waste-to-Energy solutions, organised by Meera Trade Fair Media Pvt. Ltd., a trusted name with years of experience in hosting successful exhibitions across diverse industries.

This pioneering event highlights how innovations in waste management can create clean renewable energy, supporting India's mission towards sustainability and circular economy

Focus Areas:-

- Food & Paper Waste-Energy
- Industrial Waste-Energy
- Plastic & Wastewater-Energy
- Agriculture waste-Energy
- E-Waste to Energy
- Biogas & Biomass Energy
- Refuse Derived Fuel (RDF)
- Pyrolysis & Gasification
- Incineration & Waste Treatment Technologies
- Landfill-to-Energy Systems

EXHIBITOR PROFILE

- ✓ **Waste management & recycling solution providers**
- ✓ **Biogas, biomass & biofuel technology companies**
- ✓ **Waste-to-energy machinery & equipment manufacturers**
- ✓ **Pyrolysis, gasification & incineration technology providers**
- ✓ **EPC companies & project developers**
- ✓ **Environmental consulting & R&D organisations**
- ✓ **Financial institutions, investors & funding agencies**
- ✓ **Government departments, municipal bodies & smart city authorities**

VISITOR PROFILE

- ✓ **Industrial & municipal waste management authorities**
- ✓ **Power & utility companies**
- ✓ **Policymakers & government officials**
- ✓ **Investors, venture capitalists & funding agencies**
- ✓ **Environmental consultants & engineers**
- ✓ **Academic institutions, researchers & innovators**
- ✓ **Entrepreneurs & startups in green energy**
- ✓ **CSR & sustainability heads of corporates**

Agriculture Waste to Energy

Crop residues, husks, and other agricultural by-products are being converted into biofuels and biogas, providing farmers with additional income streams while reducing open-field burning.

Wastewater to Energy

The conversion of wastewater into biogas and clean energy is playing a vital role in reducing water pollution and generating renewable power,

Plastic Waste to Energy

Innovative technologies are enabling the transformation of non-recyclable plastic waste into fuel and electricity, reducing landfill dependency and addressing environmental

Food Waste to Energy

Organic waste from households, restaurants, and food industries is being processed into biogas and compost, reducing greenhouse gas emissions and enhancing waste management efficiency.

Industrial Waste to Energy

Industrial by-products, including hazardous and non-hazardous waste, are being utilized for energy recovery, supporting sustainable manufacturing and lowering environmental

Paper Waste to Energy

Waste paper and pulp residues are increasingly used as a raw material for biomass energy production, helping industries cut carbon emissions and promote circular economy practices.

Event Highlights

- First-ever specialised Waste to Energy Exhibition in Pune
- Showcase of the latest technologies: biogas, biomass, gasification, incineration
- Expert panel discussions on sustainable energy futures
- Exclusive networking between industry leaders, government bodies & investors

Who Will Benefit?

This expo is specially designed for:

- Technology Providers & Innovators in biogas, biomass, gasification & incineration
- Municipal Bodies & Policy Makers seeking sustainable waste management solutions
- Investors & Financial Institutions exploring green energy opportunities
- Industries & Corporates generating agricultural, industrial, plastic, and food waste
- Academia & Research Institutions working on renewable energy innovations

1st Edition Highlights

- Exclusive Launchpad for the Waste to Energy sector in Pune
- Expert-Led Conferences & Knowledge Sessions
- Technology Showcases & Live Demonstrations
- Strategic Networking with government, industry & investors
- Recognition for Pioneers driving change in sustainable energy

Waste to Energy 2026
